“Without a doubt after 40 years of experience of ministry to men, this vicious and debilitating vice of pornography has affected more men than we want to admit. I highly encourage men to purchase the DVD of this event, if not for yourself, then for your ability to help your family and brothers in their struggle. If brothers stand together in Christ and cover one another with brotherly love and commitment, even this bondage can be broken! Let's equip ourselves for the battle for our freedom.
